ZIYUAN SHEN

2616 Erwin Road, Durham, NC 27705
Phone: (984) 209 6014 Email: ziyuan.shen@duke.edu

LinkedIn Profile: https://www.linkedin.com/in/ziyuan-shen/
Technical Portfolio: https://ziyuan-shen.github.io/

EDUCATION

Duke University *August 2018 - May 2020 (expected)*
Master of Science, Electrical and Computer Engineering
Overall GPA: 4.00/4.00
Data&ML coursework: Statistical Programming (R); Deep Learning; Machine Learning; Vector Space Methods, etc;
EE coursework: CMOS VLSI Design; Computer Systems and Engineering;

Southeast University *September 2014 - June 2018*
Bachelor of Engineering, Information Science and Engineering
Overall GPA: 3.72/4.00
Programming coursework: Fundamentals of Computer Science (C++ Programming); Data Structures;
EE coursework: Computer Arch.&Logic Design; Digital Circuits; Analog Circuits; Signal Processing; Automatic Control, etc

TECHNICAL STRENGTHS

Computer Languages	Python, SQL, R, C++, Shell Scripting, AWK, LaTex, Markdown, HTML/CSS
Database&Visualization	PostgreSQL, SQlite, MySQL, Apache Spark, Pandas, Matplotlib, Seaborn, ggplot
Other Tools	Scikit-Learn, TensorFlow, Keras, PyTorch, NumPy, Git, Vim, R Shiny, GNU Make

EXPERIENCE

Duke Institute for Health Innovation May 2019 - Present
Data Analyst Intern *Durham, NC, United States*

· Development Language: Python, SQL, Shell Scripting (Github)
· Predict patients' deterioration (ICU admission, mortality, etc) in real time and ultimately standardize response protocols.
· Manipulate large-scale (1 TB data & over 200k encounters) hospital data (cleaning, visualization, quality assurance, etc).
· Build model achieving average precision 7 times better than the baseline model which is currently in use in Duke Hospital.

National Mobile Communications Research Laboratory March 2015 - June 2018
Research Assistant *Nanjing, Jiangsu, China*

· Achievements: 7 publications (4 **first-author** publications) and 3 patents
· Conduct DNA programming research for computing Deep Neural Network, Markov chains and digital logic.

PROJECTS & PUBLICATIONS

Recent Research & Projects Machine Learning, Data Analysis, App Design

Medical Outcomes Prediction:
· Predict time-series medication administration (Github) and hospital readmission (Github) using MIMICIII Dataset.
· Classify breast cancer subtypes using Breast Cancer Wisconsin Dataset and achieve AUC of up to 0.993 (Github).
· Utilized: Python, PostgreSQL, SQlite, Keras, LSTM, Scikit-Learn, PCA, T-SNE, Matplotlib

Image Analysis and Classification:
· Open Source Contribution: add SPIE-AAPM-NCI breast cancer whole slide image dataset to TensorFlow datasets (Github).
· Implement Squeeze and Excitation network to classify Oxford Pet and Cifar10 datasets (Github).
· Utilized: Python, TensorFlow, CNN

Web Scraping & App Design:
· Design web applications that serves as Central News Hub (Github) and NBA Statistic Hub (Github).
· Utilized: R, HTML, R Shiny, ggplot, GNU Make
